You could donate or waste the bed linen, or you could recycle this used fabric and turn it into something new. If you lack ideas, we have developed several clever uses for old leaves that could improve lives. For example, these projects could help you eliminate waste in your home or help you become a more efficient gardener. It is worth noting that you do not need to take a number of torn leaves. Do you generally have too many leaves? Many at home Experts recommend keeping no more than two sets of bed linen per bed. If you have more than this recommendation, you should consider cleaning your laundry cabinet and embarking on one of these DIY projects. Paper towels are a thing of the past as more and more people work to reduce waste in their homes. If you have a set of old leaves, you should cut them into some reusable cleaning cloths. Cotton sheets will make ideal vacuum cleaners and can even be used to polish stainless steel appliances. Just grab a sharp scissors and cut the leaves into straight rectangles. Mollie Johanson leaf fabric may not be durable enough for a purse, but they are an ideal fabric for bags. Drawstring bags can serve many applications. You can use them to organize travel essentials, wrap gifts or keep your wallet organized. This drawing bag tutorial will show you how to make a simple bag. Thick, opaque sheets can work well as a weed barrier in your garden. Make sure your leaves are not thin or transparent. Darker colors work best. If you have plenty of open space in your garden bed, deposit parts of your old leaf before unloading it with a few inches of fresh mulch. If you have lighter cotton leaves, you can use them in your garden in winter to protect more sensitive perennials. Mollie Johanson There are a variety of accessories that you can make with old leaves. Pretty much anything that can be made with cotton should be considered. This double-sided belt project can't consume much of your old leaves, but if it goes well, make a few belts for the whole family. Slender, wrinkle-free white sheets make large curtains in country-style houses. In fact, it might be cheaper to buy a range of inexpensive twin sheets and turn them into curtains than to buy custom window screens. The savings add up if you have odd windows and require a custom width or length. capecodphoto / Getty Images Think about making a braided carpet with old bedding. This DIY project may require some patience to create, but the end result will help you use old leaves and other scrap fabrics that take up space in your craft room. Old sheets can be turned into a tug-of-war with dog toys. The thicker they can make this dog toy, the more durable the toy is. To complete this project, cut your old leaves into several long, thin strips. We recommend keeping the strips about two inches thick and three feet long. Take all the strips and then bind large knot sat at the end. Separate the strips into three sections and proceed to weave the sections together. Finally, knot the bottom of the toy. Mollie Johanson plastic bags are terrible for the environment, so many places enforce plastic bag bans in shops. Even if you can still use plastic bags, it might be worth turning your bed linen into food bags instead. Try this long-lasting food bag pattern with a pair of patterned or solid leaves. This old leaf idea is similar to the bag or the is different. Leaves make a great fabric for creating a boho-inspired yoga mat bag. This article has different yoga mat bag patterns to choose from. Farmhouse on Boone Lisa from Farmhouse on Boone has a very clever idea for reusing old leaves. She turned some old, patterned bedding into pajamas for her daughters. Go to her girl's pyjama tutorial to find out how to make your own set. Bed sheets make ideal art smocks as long as the fabric is thick enough that art supplies do not leak easily. You can find an example online to sew, or you can simply cut a hole in the middle of the sheet and put the sheet over your head. Cutting a hole is a quick way to protect your clothes when you take over a project in no time. Getty Images Even small animals like bed bugs have favorite colors. Cute, right? Well, not if your bed linen happens to be just as much hue. In a new study published online in the Journal of Medical Entomology, the researchers examined which colors prefer ordinary bed bugs by placing tiny pieces of cardboard in eight different colors in petri shells. A bed bug dropped in the middle had 10 minutes to decide which one wanted to hide. The two main color options: red and black. Red, which bed bugs have chosen about 29 percent of the time, can signal the presence of other bed bugs. We originally thought that bed bugs might prefer red because blood is red, and that's what they feed on, study co-author Corraine McNeill, an assistant professor of biology at Union College in Nebraska, said in a statement. However, according to the study, the main reason why we think they prefer red is because bed bugs themselves appear red, so they go to these port go because they want to be with other bed bugs. Apparently bed bugs like to cuddle (in the red sheets). Black came in second place nearby, with errors choosing the hue 23 percent of the time. Scientists suspect this is because the bugs naturally seek darkness: bed bugs are usually night-turning and hide in the corners of mattresses and other nooks and crannies before they come out to snack on blood, Newsweek reports. Fascinating. Getty Images insects use visual cues for a variety of behaviors, including, but not limited to, identifying hosts, finding partners, picking eggs and seeking protection, the researchers write in the study. The visual cues are often based on the perception of color. If you have yellow or green leaves, you're lucky. The bed bugs didn't seem to like these colors, possibly because they illuminated areas are similar to those that the insects tend to avoid, according to a press release from the Entomological Society of America. Ready to burn your red and black leaves? Drop the games. Scientists suggest keeping the destruction of linen based on their color – for now. h/t: Throttled This content is created and managed by third parties and imported to this page to help users provide their email addresses. you may find more information about this and similar content content piano.io piano.io
